

PHILOPATER SHENOUDA

Junior Penetration Tester

Address: Cairo, Egypt | Phone: +201555181415 | Email: Philopater.Pentester@outlook.com

LinkedIn: linkedin.com/in/philopater-shenouda | Github: github.com/PhilopaterSh |

Medium: medium.com/@PhilopaterSh

PROFILE

Information Technology graduate and Junior Penetration Tester specializing in offensive security, vulnerability management, and risk analysis. Backed by structured training from NTI, DEPI, and an intensive cybersecurity diploma, with hands-on experience executing simulated Red Team exercises and live Bug Bounty research. Skilled in building target-oriented exploration and automation scripts in Go/Python, delivering compliance-aligned remediation reports (NIST/ISO 27001), and demonstrating a curious attacker's mindset.

PROFESSIONAL EXPERIENCE

Digilians | *Cybersecurity Participant (Diploma)* | Dec 2025 – Sep 2026

- Selected for a prestigious national scholarship in collaboration with the Egyptian Military Academy and global tech leaders (Google, AWS, Palo Alto, Fortinet).
- Developed practical expertise in VAPT, system hardening, and security frameworks through an intensive industry-aligned curriculum.
- Applied Agile methodologies and SMART goals within cross-functional teams to manage project deliverables using Notion and Excel.

Bug Bounty Hunter | *Bugcrowd / HackerOne (Part-time)* | Aug 2025 – Dec 2025

- Discovered and responsibly disclosed critical vulnerabilities across enterprise target scopes, including IDOR, PII Breaches, Broken Access Control, XSS, and OTP Bypasses.
- Demonstrated high-impact flaws by manipulating HTTP requests, bypassing multi-factor authentication (MFA) logic, and hijacking administrative privileges.
- Authored detailed vulnerability reports with technical proof-of-concepts (PoCs) and actionable remediation strategies.

National Telecommunication Institute (NTI) | *Ethical Hacking Intern* | Feb 2025 – May 2025

- Participated in an intensive 288-hour program simulating advanced web and network Red Team exercises and real-world attack campaigns.
- Utilized Nmap, Burp Suite, Metasploit, and Wireshark for target reconnaissance, traffic analysis, and Active Directory exploitation.
- Developed custom Python and Go scripts to automate network packet manipulation and optimize exploit research workflows.

Digital Egypt Pioneers Initiative (DEPI) | *Vulnerability Analyst Intern* | Apr 2024 – Oct 2024

- Conducted automated and manual vulnerability analysis using Nessus and OpenVAS, mapping infrastructure flaws to NIST and ISO 27001 compliance frameworks.
- Exploited OWASP Top 10 flaws (SQLi, XSS, CSRF) within simulated staging environments to validate risk severity and document hardening techniques.

YAT Learning Centers | *Technical Trainer (DECI Program - Part-time)* | Feb 2024 – Sep 2025

- Instructed 100+ students in programming and cybersecurity, simplifying complex security and ethical hacking concepts into engaging models that increased technical awareness by 30%.

EDUCATION

The Egyptian E-Learning University (EELU) | *Bachelor of Information Technology* | 2020 – 2024

- GPA:** 3.08 / 4.0
- Graduation Project:** Electronics E-store (**Grade: A+**)
- Project Role & Contribution:** Programmed an AI server in Python and established an API to connect it with a PHP backend. This integration ensured seamless data exchange between the AI module and the main application, enabling efficient machine-learning functionalities within the project.

COURSES & CERTIFICATIONS

- **Cybersecurity Foundations: GRC** | *LinkedIn Learning* (ID: 48f6e451dae4) · **May 2026**
- **Cybersecurity Leadership & Management L2** | *Coursera / Infosec* (ID: 7Y8lo1uxRLWP) · **May 2026**
- **Google Cybersecurity Professional Certificate** | *Google* (ID: 7PUFLHHFI89P) · **Apr 2026**
- **Vulnerability Analysis / Penetration Testing** | *DEPI* · **Oct 2024**
- **ECIH v2 – Certified Incident Handler** | *EC-Council* (ID: 710621) · **May 2024**
- **Red Hat System Administration I** | *MaharaTech / ITI* (ID: vQ2a6b4aty) · **Dec 2023**
- **eJPT v1 – Junior Penetration Tester** | *Netriders* (ID: e3846066b91b6ddd) · **Aug 2023**

TECHNICAL SKILLS

- **Offensive Security & VAPT:** Penetration Testing (Web & Network), Red Teaming, Vulnerability Assessment, Bug Bounty, Web/Network Attacks, Web Reconnaissance, OWASP Top 10, API Security.
- **Security Operations & Defense:** Cybersecurity Incident Response (ECIH), Hardening (Windows AD & Linux), Malware Analysis & Sandboxing.
- **Systems & Networking:** Red Hat Linux Administration, Networking Protocols, Infrastructure Security, Troubleshooting, Routing & Switching (CCNA), DNS/DHCP Security.
- **Automation & Development:** Go (Golang), Python Programming, Scripting (Bash/PowerShell), Git & GitHub.
- **Emerging Tech & GRC:** Artificial Intelligence (AI) & LLMs, Cyber Governance, Risk Management & Compliance (GRC), Frameworks (NIST/ISO 27001), Information Assurance.

SOFT SKILLS

- **Leadership & Management:** Team Leadership, Cybersecurity Management, Project & Time Management.
- **Communication & Delivery:** Public Speaking, Technical Trainer/Mentorship, Public Relations (Stakeholder Management), Presentation Skills.
- **Core Competencies:** Analytical Problem-Solving (Root Cause Analysis), Continuous Self-Learning, Adaptability, Professional Ethics.

PROJECTS

PhilopaterSh URL (Go / Automation) | https://github.com/PhilopaterSh/Ph.Sh_URL

- Developed a high-performance concurrent URL extraction and filtering tool in Go, automating asset discovery workflows.
- Integrated multiple passive API data sources, resulting in a **60% reduction in reconnaissance time** and a **25% increase in sensitive endpoint discovery**.

PhilopaterSh Subdomain (Go / Recon) | <https://github.com/PhilopaterSh/Ph.Sh-Subdomain>

- Engineered a parallel-processing subdomain enumeration tool in Go to aggregate fragmented attack surface data.
- Streamlined the asset discovery phase, delivering a **40% more comprehensive view of target infrastructure** compared to single-source utilities.

LANGUAGES

- **Arabic:** Native / Bilingual
- **English:** Conversational
